Training

I am CPR certified and have experience performing CPR in an emergency environment. I have completed a course in medical terminology, am a certified phlebotomist, and a member of the American Society for Microbiology. I have leadership experience as a founding executive member of a club on ASU's campus and have also gained experience working with a non-profit 501 (c)(3) as the Red Cross Club at ASU cooperated closely and was under the guidance of the Grand Canyon Chapter of the American Red Cross. During our first year in operation we successfully held multiple blood drives on campus, as well as other types of charitable drives and public health campaigns on issues pertaining to ASU's population.
