EDUCATION

General Assembly, Web Development Immersive   Boston

Developed several full stack applications utilizing version control and working collaboratively and independently.

Some Completed Projects:

Opinionated:
A full stack application utilizing Bootstrap, Handlebars, Ruby on Rails, SQL, JavaScript, jQuery, etc. This app allows users to sign in, add discussion topics, and comment on other users' discussion topics. This app employs character maximums in an attempt to keep discussions on-point and promote civil debate.

¡surveyZa!:
A full stack application utilizing Bootstrap, Handlebars, Express, SQL, JavaScript, jQuery, etc. This app allows users to sign in, and create surveys for their friends to vote on.

Arizona State University, Bachelor of Science, Microbiology   Tempe

May 2011
